# get the page html
page <- read_html("https://www.espn.com/player/team/india-6")

# output the html text to a text file
write_html(page, "html_text.txt")
```

Because the original page is a scrollable version, we need to get the html of the page after scrolling down to the bottom of the page. This has to be done manually due to the dynamic nature of the page.

```
# The html of the page after scrolling down to the bottom is saved in the file "html_text2.txt"
page <- read_html("html_text2.html")

# get the text from the page itself
compact_name <- page %>%
  html_nodes(".ds-text-compact-l.ds-font-medium.ds-text-ui-typo") %>%
  html_text()
name <- page %>%
  html_nodes(".ds-text-tight-l") %>%
  html_text()
age <- page %>%
  html_nodes(".ds-text-tight-m.ds-font-regular.ds-text-ui-typo-mid") %>%
  html_text()
```

```

# get the nodes with this specific class
# ".ds-inline-flex.ds-items-start.ds-leading-none"
# and then get the href attribute from those node
links <- page %>%
  html_nodes(".ds-inline-flex.ds-items-start.ds-leading-none") %>%
  html_attr("href") %>%
  paste("", ., sep = "")

# keep only the links which start with "https://www.espncriinfo.com/player/"
# (keep only links to player pages)
links <- links[grepl("https://www.espncriinfo.com/player/", links)]

# remove last the row
links <- links[-length(links)]

# get the data for each player
more_info <- function(player_link) {
  player_page <- read_html(player_link)
